- Lunch times include when lunch is served, not the time for eating lunch. Adding and subtracting time is an attempt to maximize the chunk of time in class for testing and presenting the assembly video.
- All students should be given 25-30 minutes to eat.
- Please keep your students with you and out of the hallways as much as possible in order to reduce distractions for students who are testing.

Example:

If normal scheduled time for 1st lunch = 10:40 – 16 min. = 10:24 + 30 lunch time = 10:54 ends*
 Class time = 10:16 to 10:24 (8 min) and 10:54 to 11:52 (58 min) Total = 66 min.

*Be flexible in case the lunch line is longer, but encourage students to be efficient, especially if you are testing.
